

Substrate Data Sheet

4G1V Mini Void White Polyester

General Discription: *This white film leaves evidence that a product has been tampered with. It is primarily used for asset tags and “Void if removed” warranty labels. When a person attempts to remove the film from the surface it was adhered to, the film will delaminate causing the top part to release a pattern that says “VOID.” That pattern appears on the film and the surface making it impossible to repair the label.*
